SAMIR PATEL

Platform Engineer | Backend & Full-Stack Software Engineer

Surat, Gujarat, India | +91 9998442728 | samirpatel8506@gmail.com | LinkedIn | Portfolio | LeetCode

PROFESSIONAL SUMMARY

Platform Engineer with 3+ years of **full-stack and backend** experience building scalable, production-grade systems, media infrastructure, and cloud-native applications on **AWS** for the global entertainment industry. Part of the core team that built and shipped an internal **media platform service** (Node.js, FFmpeg, Sharp, S3, CloudFront) that replaced Cloudinary and AWS Elemental across all company products, **cutting storage and transformation costs by 42%.** Experienced in **RESTful API design**, **performance and load testing (k6)**, payment integrations, **CI/CD** and release management, and mentoring engineers. Strong in **Node.js, NestJS, React.js, Next.js, PostgreSQL, and DynamoDB**.

TECHNICAL SKILLS

Backend: **Node.js**, Bun.js, **NestJS**, **RESTful APIs**, API Design, JWT Authentication, Microservice-style Internal Platform Services, **FFmpeg** (Video Transcoding, HLS Transmuxing), Sharp (Image Processing)

Frontend: **React.js**, **Next.js**, Redux, HTML5, CSS3, Tailwind CSS, MUI, Flutter

Mobile: Swift, UIKit, Flutter, XCTest

Cloud & Infrastructure: **AWS** (S3, CloudFront, EC2, Lambda, Elemental MediaConvert), Cloud Architecture, CDN, Media Streaming, Signed URLs, DDoS Mitigation

Databases: **PostgreSQL**, **DynamoDB**, SQL, Redis, Firebase, Core Data

Testing & Performance: **k6** (Load Testing), Performance Optimization, TDD, XCTest, Postman

Tools & Practices: Git, GitHub, Nx (Monorepo), Feature Flags, **CI/CD**, Agile/Scrum, Jira, Confluence, VS Code, Cursor, Xcode

AI & Integrations: OpenAI API, Claude API, Groq LLM, RAG, RecurlyJS, Razorpay, Google Maps API

PROFESSIONAL EXPERIENCE

Software Engineer (L2) – Platform Engineer

Talent Systems Pvt. Ltd. (Casting Networks) | Nov 2025 – Present

- As a core team member, helped build an internal **media management service** as part of a company-wide **cost-reduction initiative** that replaced **Cloudinary and AWS Elemental** across all products, covering **S3** uploads, **FFmpeg** video transcoding, **HLS** transmuxing, **Sharp**-based multi-resolution and multi-format image transformation, signed URL generation, and **CloudFront** cache invalidation.
- Prepared the **load-testing plan** and executed **k6** tests to validate the media management service before launch, covering upload, transcoding, and image-transformation workflows at **20 requests/sec**; measured a **p95 latency of 495 ms** and a **2.1% error rate**, and delivered the results report to support the production go-live decision.
- Lead **frontend development and architecture** for R&D and production initiatives across the Casting Networks, FastCast, and StaffMeUp products.
- Architected a reusable **UI abstraction layer** wrapping MUI and RizzUI with custom components to handle complex, evolving UI/UX requirements.
- Own the full frontend **release lifecycle**, including build optimization, deployment pipeline management, and early issue detection.
- Collaborate with Product and Design teams to translate fast-changing requirements into user-facing features.
- Produce biweekly leadership reports on MVP feature performance, user feedback, and adoption metrics.
- Partner with the Tech Lead on cost and timeline estimation and feasibility assessments for new feature integrations.
- Drive experimentation with **AI-powered systems** and guide team adoption of new tools and approaches.

Junior Software Engineer – Full Stack

Talent Systems Pvt. Ltd. (Casting Networks) | Jan 2024 – Oct 2025

- Migrated media management architecture from **Cloudinary to AWS**, achieving **30% faster** first-load rendering for large media files and a **42% reduction** in storage and transformation costs.
- Integrated **RecurlyJS** to support recurring and one-time subscription payments via Apple Pay, PayPal, and cards in GBP and USD.
- Implemented a **DDoS mitigation** solution to strengthen platform security.
- Supported the daily release process using **feature flags** for rapid, controlled feature delivery.

- Transitioned the frontend codebase to an **Nx monorepo** to improve maintainability and code sharing.
- Wrote and executed **XCTest** cases for the iOS app, increasing test coverage from **20% to 76%**.
- Contributed to **database design** and requirement gathering, and designed application workflows to streamline development and improve UX.

Software Engineer Intern
Talent Systems Pvt. Ltd. (Casting Networks) | Jul 2023 – Dec 2023
- Developed and deployed a **full-stack production project** for the entertainment industry (Spotlight One) using modern web, mobile, and cloud technologies.

EDUCATION

Bachelor of Technology, Computer Engineering | June 2024 | **CGPA: 8.98/10**
Charotar University of Science and Technology (CHARUSAT), Devang Patel Institute of Advance Technology & Research, Changa, Gujarat, India

PROJECTS

Memoria – AI Event Photo Sharing Platform (In Development) | Face Recognition | ai-album-website-ps.netlify.app
- Building a **face-recognition** photo-sharing platform where photographers upload an event once and each guest takes a single selfie to receive only the photos they appear in.
- Built the product website with use-case pages for weddings, corporate events, schools, colleges, and sports, plus pricing, blog, and contact pages.

Personal AI Assistant | Python, FastAPI, RAG, Groq LLM | samirpatel.in
- Built and deployed an AI assistant on my portfolio site using a **Retrieval-Augmented Generation (RAG)** architecture, with a **FastAPI** backend for query processing and context retrieval and **Groq LLM** for low-latency inference, grounding responses in portfolio data.

HareKrsna TV (iOS App) | Swift, UIKit | App Store
- Rebuilt ISKCON Desire Tree's iOS app from scratch in **Swift** (from Objective-C), starting from version 4.1; added background video playback and published to the App Store.

DGCourier | Google Maps API, Razorpay
- Built a courier application with order placement, real-time tracking via **Google Maps**, and **Razorpay** payment integration.

SamzZ Go | OpenAI API, Text-to-Speech | LinkedIn Post
- Built an AI app using the **OpenAI API** for prompt-based image generation, harmful content detection with percentage scoring, and text-to-voice with language selection.

CERTIFICATIONS & ACHIEVEMENTS

- Meta Front-End Developer Certificate
- Solved **250+** Data Structures & Algorithms problems on LeetCode
- Attended Android Development Workshop, Techfest, IIT Bombay (December 2022)
- Participant: Pythakon & SSIP Hackathon (2022); DEBUG-A-THON, Depstar Coding Club (2021)
